

EUROENGEO 2008
The City and its underground environment

From 15th to 20th September 2008, Euroengeo 2008 will be taking place in Madrid, a Forum which will hold meetings and exchanges of ideas and knowledge between specialists and experts in the field of Geology applied to engineering.

On this occasion, the main theme of the congress will be fundamentally based on the “The City and its underground environment“.

The congress themes are:

- New methods of tunneling in urban areas
- Solid waste disposal in the vicinity of large Urban developments
- Rehabilitation of historical areas in cities. New low impact methods of excavation and underpinning
- Prone to evolution materials
- Geological risks in cities
- Education and training in geological engineering

This however does mean any restriction on other related fields of activity in / on this second edition of EUROENGEO.

EUROENGEO will take place in Madrid, Spain:

ESCUELA DE INGENIERÍA DE OBRAS PÚBLICAS
C/ Alfonso XII, n 3 y 5, 28014 MADRID
UNDERGROUND: Atocha Renfe (línea 1)
RAILWAY STATION: Atocha
BUS: 10, 14, 19, 24, 26, 32, 37, 54, 57, 59, 68, 69, 85, 86, 102, 140, 141.

Participants can send posters and contact us at the following address:
